

ADVANCED POWER

"It's Watt We Do."

COMPANY PORTFOLIO

Same Great Family Business.

Since 1988!

COMPANY OVERVIEW

30 YEARS OF EXPERIENCE

From our humble beginnings in 1988, to our present day manufacturing facility in Weatherford, Oklahoma, we have grown into one of the largest and most trusted companies in the solar industry.

Our friendly, knowledgeable sales staff will always provide the best guidance in choosing the system to best fit your needs. Ensuring customers' experiences by taking the guess work out of solar and providing free technical support.

OUR MISSION

To aid our thousands of worldwide customers we provide the best service and highest quality products in the industry. Our core values of respect, high standards, teamwork, honesty, and accountability every visit.

FOUNDERS

Butch & Penny Robison created Robison Solar Systems in the small town of Canton, Oklahoma in 1988 while working on their family farm.

Robison Solar Systems partnered with Advanced Power Inc. in 2006 to expand their solar products.

Since then, API has turned into a family business of 16+ employees.

SERVING WORLDWIDE

Selling in over 44 countries.

"Thanks for all your help and excellent customer service! Your products are outstanding too! I just retired after 20 years in the Air Force and have seen a lot of high grade equipment; your product really impressed me. I had my entire system up and running in less than two hours; I would recommend the fitting kit to all your customers; what a time saver for just \$18.00

I will recommend your products and business to everyone I know. Keep up the great work!"

★★★★★ -Roland Delauney

"I have been a customer for over ten years and have had great success with their products and service. They go out of their way to see to it that I am satisfied. I recommend API to all of my friends."

★★★★★ -Jerry Haw

"While installing the system was able to call technical support with a couple of questions and received immediate answers, friendly knowledgeable staff helped to design right pump pressure requirements for my locale."

★★★★★ -Mike Sanders

PRODUCTS

THE TOTAL PACKAGE

Advanced Power Inc. is not just a solar pump manufacturer but supplies solar powered equipment to consumers.

Taking the confusion & guess work out of solar, API provides the best quality solar on the market in kit form. Kits, or systems, ensure customers receive everything they need in one purchase.
